

USSMC EEO and Project Management Tracking System

“Advancing in Tracking Claims and Tasks”

USSMC’s EEO Tracking System: is an enterprise level web-based thin client application. This is designed to be the simplest, most powerful system on the market that effectively monitors workflow and EEO complaint-related issues and bases.

USSMC licenses its **EEO Tracking System:** (or any other USSMC custom-designed web based tracking system) as a perpetual license (132-33) for the life of that version number, with additional charges for maintenance and customization (132-34), plus training and on-site database administration (132-51). When a new version of the software becomes available with a different interface, new information, and/or more features, then a new set of perpetual licenses will be applied and the customer must purchase this new license.

USSMC’s EEO and Workflow Software: is usually used in conjunction with a consulting assignment. USSMC provides a multi-faceted EEO solution; the software includes an ongoing query and trigger alert system, database and report tool and processes plus extensive features and interoperability.

USSMC EEO Tracking System features include:

- EEOC MD 110 and MD 715 compliant;
- Section 508-Compliant;
